## **Home Care Assistance Achieves Prestigious Ranking in *Entrepreneur's* Franchise 500® Two Years in a Row!**

*Jumping nearly 130 places on the list, Home Care Assistance continues to grow at an astonishing pace*

(Palo Alto, CA – January 5, 2011) Home Care Assistance (<http://franchise.homecareassistance.com/>), a senior care company specializing in homebound care and live-in care, was ranked 251 on the list of *Entrepreneur's* Franchise 500®, compared to last year's ranking of 380 – a significant increase in position on a list that already represents the best franchises worldwide. *Entrepreneur's* Franchise 500® judges all companies on the same criteria regardless of size. Important factors used to compare franchise operations include but are not limited to: financial strength, stability, growth rate, size of system, startup costs and percentage of terminations.

"We are thrilled to be listed as a Franchise 500® company again in 2011," said Jack Johnson, Vice President of Franchising for Home Care Assistance. "Even more exciting, however, is how much our ranking has improved. I attribute this to the quality franchise owners throughout our system who are beating their competitors and thriving in their local markets. As a result, we have seen a significant amount of growth in the company as a whole, both financially and geographically."

Home Care Assistance Franchise has grown to over 50 locations in the United States and Canada in just five years. 83% of the locations that opened in 2008 grew in 2009. Of these, almost 70% grew more than 20% year to year. This past year, Home Care Assistance grew 27% as a company, despite an economy that has still not fully rebounded. Specializing in longer hour, live-in home care cases, Home Care Assistance continues to excel across the senior care franchise vertical due to its unique focus on live-in care (leading to higher, faster profits), its large exclusive territories and a turnkey system for hiring caregivers and acquiring clients. All of this has led to network-wide weekly client billings nearly four times higher than the industry average.

Lily Sarafan, Chief Operating Officer of Home Care Assistance, shared, "While the recognition we have received through the Franchise500® and numerous other awards is a strong testament to the caliber of our organization, it is the outstanding financial performance and high satisfaction of our franchisees throughout North America that serve as our strongest validation."

Senior home care is one of the most lucrative business opportunities of the foreseeable future. The North American population is growing older at the fastest pace in history, with the number of seniors aged 65 and older expected to exceed the number of children under the age of 15 by 2015. According to the AARP, an overwhelming majority of seniors – 89 percent – would choose to age in their own homes if given the option, which is why home care continues to be the preferred choice for adult children when it comes to finding care for a parent or loved one.
