Home Care Assistance to Host Educational Series on Boosting Brain Health

Home Care Assistance's six-part Mind Fit Series in partnership with Kettering Health Network will focus on enhancing brain health through various lifestyle factors including cognitive activities used in the company's proprietary Cognitive Therapeutics Method™

(Dayton, Ohio – September 22, 2016) [Home Care Assistance of Dayton](#), a leading provider of in-home care for seniors, is excited to announce that it will be hosting a fun and informative six-part series in partnership with Kettering Health Network's Years Ahead program. Led by Home Care Assistance's brain fitness expert and Cognitive Therapeutics Interventionist, Jennifer Couch, The Mind Fit Series: Activities to Boost Brain Health will cover proactive ways to enhance cognitive functioning, including activities used in the [Cognitive Therapeutics Method™](#), a science-based cognitive stimulation program. The series will kick-off Friday, October 7 with subsequent sessions on Fridays. This event will take place at the Kettering SDA Church and is open to the public, free of charge.

"I am really looking forward to launching the Mind Fit Series as part of Kettering Health Network's Years Ahead program," said Jennifer Couch, Client Care Manager at Home Care Assistance. "Feedback from series attendees from our last series at the Alzheimer's Association was overwhelmingly positive, with individuals reporting that they not only thoroughly enjoyed doing the activities but also felt the activities positively challenged their minds."

Valerie Parker-Haley, who is the Community Outreach Manager for Kettering Health Network, is looking forward to this opportunity. "Years Ahead is happy to be able to participate in a quality class such as the Mind Fit Series to help improve the health and wellbeing of the seniors in the communities we serve," said Valerie.

Just like the body, the brain experiences changes in structure and function as a result of aging. While this is typical for everyone, there are positive lifestyle changes you can make to keep your mind sharper for longer. The Mind Fit Series, based on Home Care Assistance's Cognitive Therapeutics Method, draws upon existing research on enhancing mental acuity throughout the lifespan and introduces activities in a fun and engaging group format.

Below are the different sessions that make up the six part series:

October 7: Social Reminiscence, Current Events, Chair Stretches, Nutrition and Brain Function

October 14: Family Feud, Pictionary, Advice Column

October 21: Trivia, Name that Tune, Logo Identification

October 28: Word Bingo, Take Away, Price is Right

November 4: Product Slogans, Word Blast, Real World Oddities and Mysteries

November 11: Conversation Starters, Scattergories, Visual Puzzles

With a mission to change the way the world ages, Home Care Assistance helps seniors live well at home through innovative offerings such as its proprietary [Balanced Care Method™](#), which emphasizes scientifically-studied lifestyle behaviors of the longest-living people on Earth, and the [Cognitive Therapeutics Method™](#), an activities-based program designed to boost mental acuity as well as delay the onset and progression of cognitive decline. Committed to community education on topics related to healthy longevity, the company has also authored an award-winning senior wellness book series, which is comprised of seven books, including *The Brain Boost: A Practical Guide to Brain Health*, *Mind Over Gray Matter: A New Approach to Dementia Care* and *Hospital to Home Care: A Step by Step Guide to Providing Care to Patients Post Hospitalization*, among others.

ABOUT COGNITIVE THERAPEUTICS

Cognitive Therapeutics is the scientific division of Home Care Assistance. The Cognitive Therapeutics Method was developed based on scientific research pointing to non-pharmacological interventions as a way to slow cognitive decline and is the first program of its kind to promote increased daily functioning through cognitive rehabilitation in the familiar home environment. The goal of the Cognitive Therapeutics Method is to improve quality of life as well as to delay the onset of new symptoms and slow the progression of existing symptoms of cognitive decline. Home Care Assistance caregivers are trained to administer activities in the Cognitive Therapeutics Method to keep clients engaged and mentally sharp. For more information about the Cognitive Therapeutics Method, visit www.CognitiveTherapeutics.com.
