Home Care Assistance Sonoma County to Host Educational Series on Boosting Brain Health

Home Care Assistance's six-part Mind Fit Series at the Oakmont Recreation Center will focus on enhancing brain health through various lifestyle factors including cognitive activities used in the company's proprietary Cognitive Therapeutics Method™

(Santa Rosa, CA – September 1, 2015) [Home Care Assistance Sonoma County](#), a leading provider of in-home care for seniors, is excited to announce that it will be hosting a fun and informative six-part series in partnership with the Oakmont Village Association led by Home Care Assistance's Brain Fitness expert and Cognitive Therapeutics Interventionist, Ann Dubell. The Mind Fit Series: Activities to Boost Brain Health will cover proactive ways to enhance cognitive functioning, including activities used in the [Cognitive Therapeutics Method™](#), a science-based cognitive stimulation program. The series will kick-off Monday, October 12th, 2015, with subsequent sessions every Monday from 10:00am to 11:30am through November 16th at the Oakmont Recreation Center meeting room. This event is open to all residents free of charge. Prior to the Mind Fit Series, Home Care Assistance owner, Peter Holewinski, will be hosting a fun and informative presentation at the Oakmont Recreation Center on proactive ways to prevent and manage cognitive decline. The presentation will be held on Monday, October 5th, at 10:00am and brain healthy snacks will be provided to attendees.

"I am really looking forward to launching the Mind Fit Series at Oakmont," said Ann Dubell, Cognitive Therapeutics Interventionist at Home Care Assistance. "Feedback from attendees in Healdsburg for the first two series has been overwhelmingly positive with individuals reporting that they not only thoroughly enjoyed doing the activities but also felt the activities positively challenged their minds."

Just like the body, the brain experiences changes in structure and function as a result of aging. While this is typical for everyone, there are positive lifestyle changes you can make to keep your mind sharper for longer. The Mind Fit Series, based on Home Care Assistance's Cognitive Therapeutics Method, draws upon existing research on enhancing mental acuity throughout the lifespan and introduces activities in a fun and engaging group format.

Below are the different sessions that make up the six part series:

October 12: Social Reminiscence, Current Events, Chair Stretches, Create a Healthy Snack

October 19: Family Feud, Pictionary, Advice Column

October 26: Trivia, Name that Tune, Logo Identification, Geographical Recall

November 2: Writing, Scrambled Sentences, Word Bingo, Alphabet Soup

November 9: Take Away, Letter Counting, Design Recreation

November 16: Magnify, Entangled Figures, Visual Puzzles

With a mission to change the way the world ages, Home Care Assistance helps seniors live well at home through innovative offerings such as its proprietary [Balanced Care Method™](#), which emphasizes scientifically-studied lifestyle behaviors of the longest-living people on Earth, and the [Cognitive Therapeutics Method™](#), an activities-based program designed to boost mental acuity as well as delay the onset and progression of cognitive decline. Committed to community education on topics related to healthy longevity, the company has also authored an award-winning senior wellness book series, which is comprised of seven books, including *The Brain Boost: A Practical Guide to Brain Health*, *Mind Over Gray Matter: A New Approach to Dementia Care* and *Hospital to Home Care: A Step by Step Guide to Providing Care to Patients Post Hospitalization*, among others.

For more information about Home Care Assistance, our services and franchise opportunities, visit homecareassistance.com.

ABOUT COGNITIVE THERAPEUTICS

Cognitive Therapeutics is the scientific division of Home Care Assistance. The Cognitive Therapeutics Method was developed based on scientific research pointing to non-pharmacological interventions as a way to slow cognitive decline and is the first program of its kind to promote increased daily functioning through cognitive rehabilitation in the familiar home environment. The goal of the Cognitive Therapeutics Method is to improve quality of life as well as to delay the onset of new symptoms and slow the progression of existing symptoms of cognitive decline. Home Care Assistance caregivers are trained to administer activities in the Cognitive Therapeutics Method to keep clients engaged and mentally sharp. For more information about the Cognitive Therapeutics Method, visit www.CognitiveTherapeutics.com.
