## Home Care Assistance to Host Educational Series on Boosting Brain Health

*Home Care Assistance's six-part Mind Fit Series at Beavercreek's Lofino Senior Center will focus on enhancing brain health through various lifestyle factors including cognitive activities used in the company's proprietary Cognitive Therapeutics Method™*

(Dayton, Ohio – October 13, 2015) [Home Care Assistance of Dayton](#), a leading provider of in-home care for seniors, is excited to announce that it will be hosting a fun and informative six-part series in partnership with the Lofino Senior Center in Beavercreek. Led by Home Care Assistance's brain fitness expert and Cognitive Therapeutics Interventionist, Jennifer Couch, The Mind Fit Series: Activities to Boost Brain Health will cover proactive ways to enhance cognitive functioning, including activities used in the [Cognitive Therapeutics Method™](#), a science-based cognitive stimulation program. The series will kick-off this Friday, October 16<sup>th</sup>, with subsequent sessions on Fridays. This event is open to members of the center, free of charge.

"I am really looking forward to launching the Mind Fit Series at the Lofino Senior Center in Beavercreek," said Jennifer Couch, Client Care Manager at Home Care Assistance. "Feedback from series attendees in other parts of the country has been overwhelmingly positive, with individuals reporting that they not only thoroughly enjoyed doing the activities but also felt the activities positively challenged their minds."

Krissi Fedkow, Lead Coordinator for the senior center, is thrilled about this opportunity. "I feel it is very important for anyone, especially seniors, to keep their minds active and to continue to learn new things. It appears members at the Beavercreek Senior Center agree. Our newsletter went out earlier this month, and after just two days, we had twelve attendees signed up for the series," said Krissi.

Just like the body, the brain experiences changes in structure and function as a result of aging. While this is typical for everyone, there are positive lifestyle changes you can make to keep your mind sharper for longer. The Mind Fit Series, based on Home Care Assistance's Cognitive Therapeutics Method, draws upon existing research on enhancing mental acuity throughout the lifespan and introduces activities in a fun and engaging group format.

### **Below are the different sessions that make up the six part series:**

**October 16:** Social reminiscence, Current Events, Chair Stretches, Nutrition and Brain Function

**October 30:** Family Feud, Pictionary, Advice Column

**November 6:** Trivia, Name that Tune, Logo Identification

**November 13:** Word Bingo, Culture, Price is Right

**November 20:** Product Slogans, Word Blast, Real World Oddities and Mysteries

**December 4:** Conversation Starters, Scattergories, Holiday Fun

With a mission to change the way the world ages, Home Care Assistance helps seniors live well at home through innovative offerings such as its proprietary [Balanced Care Method™](#), which emphasizes scientifically-studied lifestyle behaviors of the longest-living people on Earth, and the [Cognitive Therapeutics Method™](#), an activities-based program designed to boost mental acuity as well as delay the onset and progression of cognitive decline. Committed to community education on topics related to healthy longevity, the company has also authored an award-winning senior wellness book series, which is comprised of seven books, including *The Brain Boost: A Practical Guide to Brain Health*, *Mind Over Gray Matter: A New Approach to Dementia Care* and *Hospital to Home Care: A Step by Step Guide to Providing Care to Patients Post Hospitalization*, among others.

For more information about Home Care Assistance, our services and franchise opportunities, visit [homecareassistance.com](http://homecareassistance.com).

### **ABOUT COGNITIVE THERAPEUTICS**

Cognitive Therapeutics is the scientific division of Home Care Assistance. The Cognitive Therapeutics Method was developed based on scientific research pointing to non-pharmacological interventions as a way to slow cognitive decline and is the first program of its kind to promote increased daily functioning through cognitive rehabilitation in the familiar home environment. The goal of the Cognitive Therapeutics Method is to improve quality of life as well as to delay the onset of new symptoms and slow the progression of existing symptoms of cognitive decline. Home Care Assistance caregivers are trained to administer activities in the Cognitive Therapeutics Method to keep clients engaged and mentally sharp. For more information about the Cognitive Therapeutics Method, visit [www.CognitiveTherapeutics.com](http://www.CognitiveTherapeutics.com).
