Based on the scientific studies of the world’s healthiest seniors, the Balanced Care Method™ promotes five key lifestyle behaviors correlated with healthy longevity: healthy diet, physical exercise, active social ties, mental stimulation and a sense of purpose and calm. Caregivers are professionally trained to incorporate the Method into daily care to encourage healthy mind, body and spirit. In addition, the Cognitive Therapeutics Method™ is a research-based program designed to promote long-term brain health and prevent cognitive decline by stimulating the five main cognitive domains with fun and engaging activities.
